DETAILED ACTION

Allowable Subject Matter

Claims 1-66 are allowed.

The following is an examiner's statement of reasons for allowance: The IDS submitted on May 26, 2005 and November 9, 2005 have been considered. None of the references or combinations thereof disclose or suggest atomic layer depositing at least one of a nitride, boride, carbide, or oxide-comprising layer onto the exposed elemental silicon-containing surface to a thickness no greater than 15 Angstroms; exposing the layer of thickness no greater than 15 Angstroms to plasma and depositing a conductive reaction layer comprising at least one of a first elemental metal or metal-rich silicide onto the plasma-exposed layer; and reacting said first metal or metal rich silicide of the conductive reaction layer with the elemental silicon of the substrate effective to form a conductive silicide-comprising contact region electrically connecting the conductive reaction layer with the substrate as required by the presently claimed invention. Therefore, Claims 1-66 are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
